BRIEF OPERATING INSTRUCTIONS

Electric Step

Electrical Circuit Diagram

Important Installation Instructions

- ⇒ Carry out the assembly with the battery negative terminal disconnected.
- ⇒ Finish all wiring before connecting the power supply cable to the positive pole of the vehicle battery.
- ⇒ Fit the rocker switch in the B column. The switch mustn't be reached when side loading door is closed.
- ⇒ Fit the rocker switch without forcing it into the cut out. The switch mustn't be jammed whilst in operation. If the switch doesn't rebound on release it might cause irreparable motor damage.

Technical Data

Load bearing capacity	Max. 150 kg
Extend time	4 seconds
Retract time	4 seconds
Operation	Via rocker switch or automatic
Safety device	Buzzer

BRIEF OPERATING INSTRUCTIONS

Electric Step

Extending the Step (Manual Operation)

- ⇒ Open side loading door completely.
  - ⇒ Press and hold the rocker switch in the B-column.
- An acoustic signal will sound. The step extends.
- ⇒ Wait until the step has fully extended.
  - ⇒ Release the rocker switch.

Retracting the Step (Manual Operation)

- ⇒ Press and hold the rocker switch in the B-column.
- The step retracts.
- ⇒ Wait until the step has fully retracted.
- The acoustic signal stops. The step has retracted.
- ⇒ Release the rocker switch.

Extending the Step (Automatic Operation)

- ⇒ Open side loading door completely.
- An acoustic signal will sound. The step extends.

Retracting the Step (Automatic Operation)

- ⇒ Close the side loading door.
- The step retracts. The acoustic signal stops once the step has fully retracted.

**⚠ Caution! Risk of injury due to movements of the step. No one is allowed to be on or in front of the step during extending or retracting process.**

Care Instructions

Depending on the degree of staining, the electric step has to be cleaned at three-month intervals as follows:

- ⇒ Remove the screw at the front end of the motor using spanner SW 17.
- ⇒ Pull out the front step manually (see figure "Spare parts overview" on the opposite side).
- ⇒ Clean the inner guide tubes.
- ⇒ Reassemble the step.

**⚠ Attention! Stainless steel, do not grease the components.**
